# Integration Programs

## Integration Program

Our employees are the most important strength of our company. Their commitment and their skills carry our business throughout the world and enable outstanding results. Integration Programs are designed to facilitate the integration of new employees in our company.

Both integration programs are tailored to the specific needs of each target group. Seize the opportunity to build up or deepen your knowledge of the entire Dräger group and its strategies and to sharpen your perspective of the big picture.

The integration programs are a great chance for networking. Your fellow participants are a source of knowledge and expertise. Please also seize the opportunity to individually meet your Lübeck key contact persons before or after your program.
